

Ideas On That OÜ Launches New Service for Placing Epitaphs on the Bitcoin Blockchain

Summary: One of the industry's most innovative companies is now offering a service that allows writing epitaphs on the Bitcoin Blockchain.

(January 27, 2021) --- Thanks to a new, revolutionary online service developed by Ideas On That OÜ, people are now able to add an epitaph on the Bitcoin Blockchain.

“In an era where so many people move far away, and burials are not always the norm, I thought of a way for an epitaph to be preserved digitally without depending on a website, so I thought the blockchain would be ideal.” said Ideas of That's Spokesman Darwin Ramon.

As for which Blockchain, Ramon explained that there are many types of Bitcoins and the text will be added to the BTC Blockchain.

“The service will place the epitaph on the Bitcoin (BTC) Blockchain via a Bitcoin transaction,” Ramon said. “Once the blockchain has confirmed the translation with the epitaph, it will be recorded forever in the blockchain. Eighty characters are allowed by protocol ”

As for how it will be added, Ideas On That uses a part of the Blockchain called OP_Return, which functions like the memo space on a check, where simple messages and characters can be placed when transactions take place.

Ramon, who holds a master's in E-Commerce from the University of Montreal and HEC, said his company's mission is to facilitate the inclusion of Bitcoins in the established economy and the launching of this new service is an innovative resource that benefits the collective memory of people that passed away.

“I am very excited about this new service,” said Ramon, who has more than 20 years of experience in ecommerce.
